MODULAR SOFA CONFIGURATION WORKSHEET

SEER STUDIO

The Seer Studio Modular Sofa is a sectional seating system built from just two modules: a Corner and a Middle. The Corner finishes each end of a run and turns the return on L-shaped layouts; Middle modules extend any run in 36" increments. Together they form straight sofas from a loveseat to a four-seater, and L-sectionals up to 154" × 154".

DEFINING YOUR CONFIGURATION

You can create your desired configuration using one of the following methods:

CHOOSE A COMMON CONFIGURATION

Find common configurations on pages 3–5. Tick the box next to your chosen layout and, for L-shapes, the orientation you need. Right / Left refers to the side of the return as viewed when facing the sofa.

CREATE YOUR OWN CONFIGURATION

Both modules, with measurements, are listed on page 2. Other layouts are possible by combining the modules in different ways — sketch yours on the grid on page 6 and note the module count.

SEAT HEIGHT

Each module's seat height is: 17" | 43 cm

HARDWARE

Connection hardware is supplied to fix the modules into the configuration ordered.

DIMENSIONS

All dimensions are nominal, shown in inches with metric equivalents rounded to the nearest centimetre.

MODULES

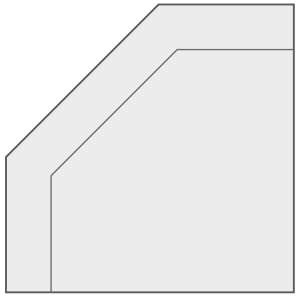

SEER STUDIO MODULAR SOFA

Two modules combine to create every configuration on the following pages.

CORNER

W41" × D41-1/2" × H30"
W104 × D105 × H76 cm

Finishes the end of a run, or turns the corner on L-shaped configurations.

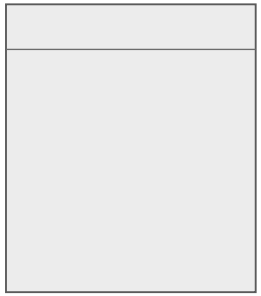

PLAN VIEW — BACK AT TOP

MIDDLE

W36" × D41-1/2" × H30"
W91 × D105 × H76 cm

Extends any run. Can sit in the main run or in the return.
